☐ a sequence listing

☐ table(s) related to the sequence listing

b. format of material

☐ in written format

☐ in computer readable form

c. time of filing/furnishing

☐ contained in international application as filed.

☐ filed together with the international application in computer readable form.

☐ furnished subsequently to this Authority for the purposes of search.

WRITTEN OPINION OF THE
INTERNATIONAL SEARCHING AUTHORITY

International application No.

PCT/US05/03465

Box No. III Non-establishment of opinion with regard to novelty, inventive step and industrial applicability

1. The questions whether the claimed invention appears to be novel, to involve an inventive step (to be non-obvious), or to be industrially applicable have not been examined in respect of:

☐ the entire international application

☒ claims Nos. 9

because:

☐ the said international application, or the said claim Nos. _____ relate to the following subject matter which does not require an international preliminary examination (*specify*):

Claim 9 is dependent on claim 9.

☐ the claims, or said claims Nos. _____ are so inadequately supported by the description that no meaningful opinion could be formed.

☐ no international search report has been established for said claims Nos. _____

☐ the nucleotide and/or amino acid sequence listing does not comply with the standard provided for in Annex C of the Administrative Instructions in that:

the written form

☐ has not been furnished

☐ does not comply with the standard

the computer readable form

☐ has not been furnished

☐ does not comply with the standard

☐ the tables related to the nucleotide and/or amino acid sequence listing, if in computer readable form only, do not comply with the technical requirements provided for in Annex C-bis of the Administrative Instructions.

☐ See Supplemental Box for further details.

WRITTEN OPINION OF THE
INTERNATIONAL SEARCHING AUTHORITY

International application No.
PCT/US05/03465

Box No. V Reasoned statement under Rule 43 *bis*.1(a)(i) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

i. Statement

Novelty (N)

Claims 1-8 and 10 YES
Claims NONE NO

Inventive step (IS)

Claims 1-8 and 10 YES
Claims NONE NO

Industrial applicability (IA)

Claims 1-8 and 10 YES
Claims NONE NO

2. Citations and explanations:

Claims 1-8 and 10 meet the criteria set out in PCT Article 33(2)-(3), because the prior art does not teach or fairly suggest the gripper mechanism disengaging completely from the plunger to allow the plunger to move away from the cartridge upon release of pressure from the trigger, in combination with the other limitations set forth in claim 1. The prior art of record discloses various trigger-actuated plunger acting upon a cartridge to dispense fluid materials. However, the gripping mechanism either remains engaged or partially engaged to the plunger upon release of pressure from the trigger; or, if there is complete disengagement at some point, it is not due to release of pressure from the trigger, but is a result of some other mechanism disengaging the gripping mechanism from the plunger.

Claims 1-8 and 10 meet the criteria set out in PCT Article 33(4), and thus has industrial applicability because the subject matter claimed can be made or used in industry.
